THE MARQUIS of Bute was the owner of large estates in Ayrshire and the Island of Bute, Scotland. Ayrshire was a country advanced for the time in farming and stock-raising. The island of Bute was backward, so early in the nineteenth century the Marquis of Bute, desiring the island developed agriculturally, requested Alexander Montgomery and Alexander Hunter with their families to come from Ayrshire to Bute, one to live on a farm in the north part of the island, the other to live on a farm in the south part of the island, so as to introduce better methods of farming and stock-breeding.

1692167

I do not know when the Carswells came to the island of Bute, nor from where they came, but think they were here before this time. This is only a small island so in time the rural population came to be mostly descendants of these early families. They were very progressive and industrious people becoming prominent as breeders of Clydesdale horses and Ayrshire cattle. Although differing as to religious beliefs and church affiliations they were almost without exception lined up with the church and ardent workers there in civic and rural government, they held their share of offices and executed them to the best interests of the community.

The Bute Agricultural Society was organized in 1806 with their co-operation. Since that time, with few exceptions, some one of their descendants has been its president. As members of this society many honors have been won by the men in ploughing matches and by the women with butter and cheese, and the domestic arts.

1. The first part of the paper is devoted to a general discussion of the problem of the existence of solutions of the system of equations (1) for arbitrary values of the parameters α and β . It is shown that the system of equations (1) has solutions for arbitrary values of the parameters α and β if and only if the condition $\alpha + \beta = 1$ is satisfied. This condition is also necessary for the existence of solutions of the system of equations (1) for arbitrary values of the parameters α and β .

Let us begin by asking the question
Why do we have a government?
The answer is simple: to protect
the rights of the people.
But what rights? The rights of
life, liberty, and property.
These are the rights that
every man has by nature.
And it is the duty of the
government to protect these
rights. For if the government
does not protect these rights,
then the people are in danger.
And if the people are in danger,
then the government is no longer
the government of the people.
Therefore, the government must
protect the rights of the people.
And this is the duty of every
man who is a part of the
government.
